HD PHOTOVOLTAICS

TAKING SOLAR TO THE NEXT PHASE

We developed a groundbreaking **Building Integrated** solution consisting of a **multipurpose polycarbonate sheet** integrated with **solar cells**. This sheet can replace traditional **roofing materials** and automatically connects without the need for cables to extract collected **energy** through the final unit.

OUR EDGE

Our Solar Sheet stands out for its **versatility**, thanks to its **ultra-lightweight**, **durability**, and **anti-dust** properties. This makes it ideal for a wide range of applications, including **rural housing**, **greenhouses**, and **various projects**.

Lightweight

Greener Life Cycle

Easy to Install

Low Maintenance

ELECTRICAL DATA

Aperature Efficiency 14.3 - 17.3%

Nominal Power 210W - 255W

Power Output Tolerance +5/-0

Maximum Power Voltage 54.3- 62.7 [V]

Maximum Power Current 3.88 - 4.07 [A]

Open Circuit Voltage 69.6 - 76.5 [V]

Short Circuit Current 4.67 - 4.47 [A]

MECHANICAL DATA

Cell type Polycrystalline

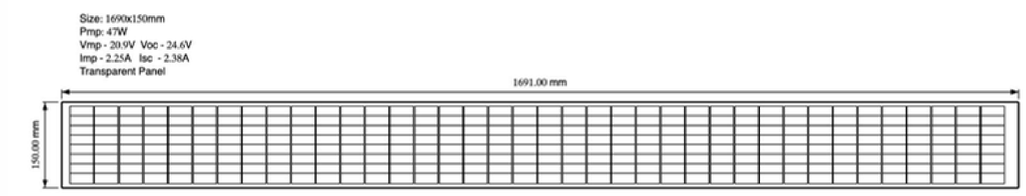
Cell layout 20 (5 X 4) x mt.

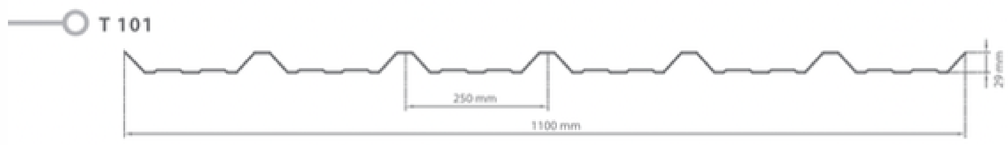
Standard length 1.00 – 2.00 – 4.00 MTS.

Standard width 1.100mm

Weight 3.5 kg x sq m

Cover: 0.8 mm a 1.2 mm





***This specs are subject to change due to continues improvement**
